UK ENGINEERING

Victor Hydraulic Bathing Hoist

The Bath Lift is powered by a pneumatic handset. This enables easy use for independent users and provides less strain for care assistants. Easily installed into confined spaces, the unit will fit most existing baths and can be easily installed with the minimum of disruption. The hoist has the ability to rotate through 360 degrees and the chair is able to rotate independently through at least 180 degrees. All manufactured and installed with UK Parts. It is able to be operated solely by one person if required, enabling independence, privacy and dignity at private residences or in busy care homes.

PRICE: £4750 + VAT inc installation
3 Year Warranty!

- SWL of 140KG
- Can be fitted at the side or at the end of your bath
- Can reach the bath, sink and toilet respectively
- Ergonomic handset for ease of use
- Can be installed into small bathrooms where manual lifts are unable to operate
- If a water therapy treatment bath is required, it is more cost effective to fit a spa bath with a Victor Bath hoist than other Proprietary Treatment Baths
- Easy to use with controls limited to raise and lower functions
